Dear sir or madame,

As a concerned citizen, I urge you to not settle the antitrust case against Microsoft giving them (as I see it) only a slap on the wrist. I am asking you to break them into an two parts, one for applications and the other for operating systems, because I see that as the only real way to truly level the playing field in the industry as they have routinely mocked the court system throughout the course of the trial.

Thank you for listening.

Nathan Ehresman
